How to Allow Popups for elearn.dscc.edu in Mozilla Firefox

After clicking on a link within your course and the content does not appear; you may have the popup blocker turned on, and you may receive the message (Firefox prevented this site from opening a pop-up window) as indicated below on the yellow bar.

To allow popups in your MyDSCC Online class, you will need to change your popup blocker settings.

This can be done by clicking the “Options” button on the yellow bar.

Once you click on the “Options” button, the menu, shown below drops down.

Click on the “Allow pop-ups for elearn.dscc.edu” link, and the allow option takes place. Return to the previously clicked link and click on it again, it should work without any problem.

If you have any questions or need further assistance, contact the DSCC Help Desk.
