Fixes for Internet Explorer to view mixed content

Open the Internet Explorer Browser, Click on “Tools Arrow” in the upper Right hand corner to expand the drop down menu.

From the “Drop Down Menu” Click on “Internet Options”

Once the Internet Options Box opens, Click on the “Security” Tab.

Click on the “Custom Level” tab near the bottom of the window.
Scroll down until you see the “Display Mixed Content” Heading, under this heading click the “Enable Button.”

Click Ok. Internet Explorer will need to be closed for your changes to take effect.
